

# CYBERSECURITY

## Supporting Democracy

As doubt continues to be cast on our entire electoral process, pressures to improve election security are reaching critical mass. As America's Election Partner, we are committed to strengthening election security and providing unmatched capabilities to those responsible for ensuring this hallmark of our democracy remains protected.

Runbeck has partnered with CyberDefenses, a premier cybersecurity services organization, to provide the highest-level of cybersecurity guidance, services, training, and support available to the elections sector today. Serving the government sector since 2001, the CyberDefenses' team understands the intricacies of protecting systems in this complex environment. Together, Runbeck and CyberDefenses form a truly unique blend of election and cybersecurity expertise and experience. We are dedicated to improving how elections are accomplished in America.

## Comprehensive Approach

We offer a unique combination of guidance, services and training. We integrate a detailed assessment, issue mitigation, end-to-end monitoring, managed services, and incident response, as well as, advanced training to ensure you are prepared to address all your cybersecurity challenges.

### Guidance and Assessment

We start with a ground-level, detailed assessment of your current cybersecurity environment. Post-assessment, each customer gets a fractional CISO who provides executive-level advice on resources, risk, and costs, along with in-depth, customized roadmaps to ensure better protection against threats in the future.

✓ **Full issue mitigation**

Our full issue mitigation services close any gaps and secure any weakness found during the assessment. As a result, your systems, processes, procedure, and staff are as prepared as possible — 24 x 7 x 365.

✓ **Full Security Monitoring Services**

Our election services portfolio is tightly engineered to ensure you are protected and prepared for any adversary. We specialize in security operations, data protection, threat hunting, dark web monitoring, issue mitigation, and cyber response. In addition, our cyber experts monitor your systems and network 24 x 7. You can rest easy because we are on watch.

✓ **Incident Response and Preparedness Exercises**

Our team is ready to jump into full action to help you respond to a cyber attack swiftly and effectively. We are able to help you stop the incident, determine the extent of the damage, and put a remediation plan into effect immediately. We can also help you prepare in advance with tabletop, hands on virtual cyber range and custom onsite Incident Response Exercises that ensure every member of your organization knows exactly how to respond to an attack before it happens to reduce the negative impact.

✓ **Cyber Academy**

We offer innovative training in many areas of threat intelligence and forensics to help you understand and mitigate cyber threats. Our education-focused model means you are enabled with the tools and knowledge you need to provide exceptional protection for your enterprise.
